

3/3/88

- Notes from Meeting with Bill Lewis (J-3-3), Steve Wolfe (TAT) re: PA of Waste Disposal, Inc..  
They were on the site on 3/2/88  
Approximately 200 drums are on the Campbell property.

approximately 2/3 of the drums are outside of a fenced area

- of these approximately 75% are empty
- of the drums with contents, most contain dirt, trash, grease or oil 1 contains latex paint.
- Many have open bung holes and have water (rain) - oil emulsions.
- Many are in bad shape S.W.: "When you lift some of them, the bottom falls out."

Of the drums inside the fence, the majority are empty (approximately 60%)

- The drums inside the fence contain mostly water, some paint, waste oil, and 1 drum contained kerosene

Some drums were reportedly there 10-15 years

"Haz cat" tests were done on 9 drums and none were found to contain hazardous substances (ignitability, corrosivity, colorimetric for metals, etc)

Bill recommends no further action on the drums.

- Regarding the soil on the Campbell property, one sample was taken of surface soil near the Chrome shop (plating). This was also negative for hazardous substances.

Bill recommends not fencing the property. He claims this would be a cosmetic action that is not warranted.

I argued that the city found surface soil levels in excess of the TLC for a few metals. The city found PAH contamination at depth, there hasn't been any extensive characterization, and this is part of an APE site. Traffic running across the site generates dust.

Another point is that the property will be an inhalation for more fumes. Although the drums may not contain "hazardous substances", they should not be out in the open so that anyone can come in contact with waste oil, etc.

Regarding the main portion of the property, Bill thinks the fencing is adequate and suggests that if we need security during our well drilling, we may have to hire a guard.

## REMARKS

My notes from my meeting with Bill Lewis, TAT.

We'll need to discuss how we can push on the fencing issue. I feel strongly that we should fence the Campbell property.

I'd also like to discuss how we'll resolve the drum issue with the county and city. The city is anxious for someone to get rid of the drums.

I'll be in tomorrow (Friday)
